Test Case: Buy T-shirt

Preconditions:

Access to the Sauce Labs Sample Application.

User is logged in. Any accepted usernames can be used.

Steps:

1. Navigate to the Sauce Labs Sample Application (https://www.saucedemo.com/) in Incognito mode.
2. Enter valid credentials to log in.
3. Verify that the login is successful and the user is redirected to the products page.
4. Select a T-shirt by clicking on its image or name.
5. Verify that the T-shirt details page is displayed.
6. Click the "Add to Cart" button.
7. Verify that the T-shirt is added to the cart successfully.
8. Navigate to the cart by clicking the cart icon or accessing the cart page directly.
9. Verify that the cart page is displayed.
10. Review the items in the cart and ensure that the T-shirt is listed with the correct details (name, price, quantity, etc.).
11. Click the "Checkout" button.
12. Verify that the checkout information page is displayed.
13. Enter the required checkout information (e.g., name, shipping address, payment details).
14. Click the "Continue" button.
15. Verify that the order summary page is displayed, showing the T-shirt details and the total amount.
16. Click the "Finish" button.
17. Verify that the order confirmation page is displayed, indicating a successful purchase.
18. Logout from the application.
19. Verify that the user is successfully logged out and redirected to the login page.

Expected Results:

At each step, the expected behaviour should be as described.

The test should run without any errors or exceptions.

All verification points should pass, ensuring the accuracy of the T-shirt details, cart contents, and successful purchase.
